PREFACE

During a continuous residence in China of more than twenty-five years, a study of the expression of the inner thoughts of the Chinese people as revealed in their government and in their art products has deeply interested me. Starting with observation and study of porcelains and coins, I continued my investigation through other fields into the more difficult one of paintings and bronzes. In all branches of art, the continuity of artistic motive is strikingly apparent. Porcelains are the best example of this principle. Nearly all of the important shapes are copied from earlier bronze vessels and the decorative designs are reproductions from earlier paintings. The underlying unity of literary and artistic product is also apparent in the constant reproduction of historical subjects and in the use of written characters as an essential part of decoration. It thus happens that the earliest art objects have both an æsthetic and an archæological interest, and that these two characteristics cannot be separated from each other.

The point of view from which I have formed my collection of Chinese art objects combines literary and archæological interest with æsthetic excellence. I have sought to judge Chinese objects by Chinese artistic standards and not solely by the promptings of a European æsthetic taste. This has led me to acquire in bronzes all shapes produced in ancient times, and to place just value upon the artistic beauty of the inscriptions of these bronze vessels. Only by such a method could I hope to appreciate Chinese art objects by the standards of the people who produced them, and to assign to different objects their correct relative importance.

The continuity of artistic motive passes down through the periods of bronzes, jades, paintings, pottery, porcelain and enamel. In these various classes the attempt at artistic expression may be seen to have been founded upon similar conceptions and emotions. The Chinese daily life and national organization center around ceremonial observance, and this fact is reflected in their art products. It serves to differentiate the point of view necessary to an intelligent appreciation of Chinese objects from that in which art is judged only by its capacity to afford personal pleasure.

The specimens which I have gathered are now being sold on account of my return to China. I cannot claim that all of them are the best of their class, but all have been chosen with great care and with an attempt to judge them by correct standards of Chinese art. The period to which each specimen is assigned has been determined with knowledge gained from Chinese authoritative books and from association with noted Chinese collectors.

JADE

Jade has been classed as a precious stone in China from the earliest times of which we have any record. In the classical Book of Poetry—Shih Ching—a beautiful woman is spoken of as a lady of jade. It has not yet been determined how ancient are the earliest specimens which are now in the hands of collectors, but without doubt some of them belong to the Chow Dynasty (B.C. 1122-255). It is probable that further investigation of ancient inscriptions and records will show that some specimens now known will be classified as belonging to the Hsia (B.C. 2205-1766) or Shang (B.C. 1766-1122) Dynasty. These jade objects were used in ceremonial presentations at court, as tokens for entry to the palace and other official residences, and for sending trusted messengers. Some objects were also used in tribal and family religious rites.

The natural beauty of the colors of jade specimens has been added to by atmospheric changes, or more often by changes produced by chemical action of the soil in which they have been buried. Disks, knives, spearheads, arrow-points, were among the earliest forms. Later they were decorated and used as ornaments for the tables of writers and artists.

PORCELAIN

69—LANDSCAPE PLATE (*Ch'ien Lung*)

It is known to have existed in China as early as the fourth century. 74—ONE PAIR OF BLUE AND WHITE BOTTLE-SHAPED VASES
(*Yung-cheng*)

This pair of vases reproduce the pale blue of the Ch'eng Hua period. The decoration is of peonies in a panel cut off by a formal scroll pattern. The potters of the Yung-cheng period were most successful in their imitation of the blue and whites of the Ming Dynasty.

Brilliant white biscuit, decorated with floral branches and fungus sprays. On the inside two bats in coral red.

78—TEA-DUST BOTTLE-SHAPED VASE (*Ch'ien Lung*)

"The tea-dust glaze has a scum of dull tea-green specks over an ochreous brown or bronze green glaze, applied either to the biscuit or over an ordinary white-glazed porcelain. It seems to have been a specialty of the Ch'ien-lung period, though there are known specimens with the Yung-cheng mark."—HOBSON. The tea-dust is a second glaze applied by blowing or flecking it over a first glaze.

Height, 5 inches.

79—SAPPHIRE BLUE BOTTLE-SHAPED VASE (*Yung-cheng*)

The vase is known by the Chinese as *pao shih lan*, "precious stone blue." It is in the list of the new glazes used during the reign of the Emperor Yung-cheng. It has a faint crackle, and according to Hobson "is apparently a glaze of the *demi grand feu*." (Repaired at the lip.)

Height, 5¾ inches.

80—PEACHBLOOM WRITER'S WATER HOLDER (*K'ang-hsi*)

Semi-globular, with broad bottom, perfect in surface. Fine, hard biscuit, covered with a very brilliant peach-bloom glaze. In color it comprehends several tones of this highly prized glaze. Mark in brilliant blue under the white glaze of the foot.

Ovoid with spreading lip. Stone ware with thick glaze.

Height, $5\frac{1}{2}$ inches.

82—SMALL JAR WITH HANDLES (*Ch'ien Lung*)

A small, beautiful example of pale pea-green (tough'ing) celadon. The perfection of the glaze reminds one of the beauty of the earlier specimens of this ware in the Sung Dynasty. The graceful handles are in the form of elephant heads.

Height, 4½ inches.

83—SOFT PASTE BLUE AND WHITE GALLIPOT (*Ch'ien Lung*)

A good example of steatitic, or soft paste ware in blue and white of the Ch'ien Lung period. The graceful shape combined with a beautiful floral decoration in deep coloring produces a beautiful specimen.

Diameter, 6 inches.

85—PAIR OF BLUE AND WHITE HAWTHORN GINGER JARS (*K'ang-hsi*)

This is an excellent pair of blue and white oviform ginger jars. The decoration consists of plum blossoms in white over a blue ground of brilliant and translucent quality. The pulsating color is broken up by dark lines painted under the blue, causing the surface to suggest the appearance of cracked ice. The plum blossoms flourish at the time of the new year in China, and is the appropriate decoration of these jars, which were used for the purpose of sending condiments to friends during the holiday season. Teakwood covers.

Height, 5¾ inches.

86—PAIR OF DECORATED WALL VASES (*Ch'ien Lung*)

The rectangular body is wider at the top than at the bottom. A floral design encloses a panel, decorated with chrysanthemums. These vases are intended to be hung on a wall as a receptacle for flowers.

Height, 8½ inches.

ENAMEL

Canton enamels are known by the Chinese as foreign porcelains—Yang-tz'u. Many specimens were painted after models brought from Western countries by early traders and missionaries. This industry was also fostered by the Emperors K'ang-hsi, Yung-cheng and Ch'ien-lung in the Imperial factories in Peking, where they had the assistance of Joseph Castiglione, an Italian priest, who trained the two brothers Chang. Many pieces produced for the palace were small, but of delicate, refined workmanship. Those produced in Canton were larger and more highly decorated.

BRONZE

Bronze vessels form the earliest attempt of the Chinese to express artistic conceptions. They are of great importance in the later development of art products as having been the original shapes copied in later materials, such as pottery and porcelain clay. The inscriptions on bronzes are the earliest records of the ideographs from which the written language of China and Japan has developed. These inscriptions, cast into the surface of bronze vessels by means of wax matrices, were part of the artistic motive. They attempted to express ideas not only accurately, but artistically.

Bronze vessels were used on ceremonial occasions in the family, tribe and nation. Offerings of wine and food were presented in these vessels to ancestors and guardian spirits. The possession of the sacrificial bronze vessels of a principality denoted overlordship. The Great Yu (B.C. 2205-2197), Emperor of the Hsia Dynasty, is said to have cast nine tripods from bronze brought from each of the nine divisions of his Empire, and these were considered as symbols of his imperial sway.

The composition of the bronze used in these vessels varies from 90 per cent copper in the dark russet-brown specimens to 60 per cent copper in the dull-gray specimens which the Chinese describe as of mercurial—Shui-yin—color. The difference in the amount of alloy and in the quality of the soil in which they were buried accounts for the great variety in the color of the patina which covers the vessels.

212—BRONZE VESSEL: TING (*Chow Dynasty*)

Tripod support. The body is richly ornamented with a conventional pattern. Through burial in damp earth, some of the metal has eroded and the decoration is almost lost to sight through the thick covering of malachite green patina and earthy substances. Part of the double hydra decoration on the top is missing and has been supplied by carving in wood. An inscription on the face indicates that this bell was cast in the T'ai Mou period (B.C. 1637). See "An Examination of Chinese Bronzes" in the Smithsonian Report for 1914, plate XI.

Height, 10½ inches; diameter, 7½ inches.

220—BRONZE WINE POT: YU (*Han Dynasty*)

Green and red patina. With cover attached by two rings to a chain handle. This vessel is usually spoken of as *t'i liang yu*, that is, a *yu* with a handle. Elaborate stand.

Height, 15 inches; diameter, 8½ inches.

221—BRONZE WINE COOLER: HSIEN (*Han Dynasty*)

PAINTING

Drawing and designs are earlier than the manufacture of the brush and of ink, but painting in the sense in which this word is now used dates from the introduction of these two media, about the beginning of the Christian Era. Since that time there has been a constant output of paintings, but existing specimens only carry us back to the seventh and eighth centuries, A.D., or even possibly in copies back to the fourth century. The most brilliant epoch of Chinese painting was the T'ang Dynasty (618-907 A. D.), and the most productive period that of the Northern (960-1127 A. D.) and Southern (1127-1280 A. D.) Sung. The short-lived Yüan Dynasty of the Mongols (1280-1368 A. D.) sought to revive the style of the T'ang artists, but the succeeding Ming Dynasty (1368-1644 A. D.) artists were content to copy after the style of the Sung Dynasty.

Landscape painting and figure painting are the earliest divisions. The luxury of the T'ang Dynasty brought about the painting of flowers, palace scenes, and birds. The rapid spread of Buddhism in this period also introduced the painting of religious subjects.

Silk fabrics carefully sized and thick paper were used for paintings, and these were favorable materials to be written upon and also for the impression of seals. On many pictures the subject and name of the artist are written, sometimes by the artist himself, and at other times by later admirers. The seals of collectors who owned pictures are also frequently impressed on the surface of paintings, and help in identifying the genuineness of specimens.

226—PLUCKING LOTUSES

Scroll on silk. In the style of Chao Ta-nien, about 1100 A.D. of the Sung Dynasty. Ming Dynasty reproduction. This is a striking treatment of a lotus garden. On one side is seen Yuan Ti Emperor of the Liang Dynasty, with his attendants, sitting in a pavilion looking out over a lotus pond. At the back of the series of pavilions are some splendid trees and rocks. The small punts in the water are moving hither and thither, while their fair occupants pluck beautiful lotuses. On the opposite side are horsemen passing along a road which skirts the edge of the pond. The artist was noted for his virile treatment of subjects, and this scroll is a good illustration of this quality.

Height, 10½ inches; length, 4 feet 1 inch.

227—MERITORIOUS STATESMEN

Scroll on silk. By an artist of the Yuan Dynasty. The twenty-four statesmen of the second Emperor, T'ai Tsung, of the T'ang Dynasty, A.D. 597-649, are here pictured. These are the men who helped him and his father in establishing themselves on the throne. The Emperor built a pavilion, Lin Yen Koh, in which he placed the portraits of these meritorious statesmen. The names of these men and their deeds are carefully recorded.

Height, 11½ inches; length, 13 feet 11 inches.

228—POETRY AND WINE IN THE LAN TING PAVILION

Scroll on silk. By Tang Ying, about A.D. 1525 of the Ming Dynasty. The artist here portrays a well-known scene in distinguished littérateurs gathered on the third day of the third moon, San Shan, to write poems and to refresh themselves with wine. The men may be seen in various parts of the garden, through which a stream of water runs. A large jar of wine is seen on the edge of the stream, and from this, wine is dipped out into large cups which are sent floating down the current. Whoever is favored by the stopping of one of these cups in front of him must drain its contents.

Height, 11½ inches; length, 17 feet 7 inches.

229—THE FOUR GRAYBEARDS

Scroll on silk. By an artist of the early part of the Ming Dynasty. These four statesmen, Tung Yuan Kung, I Li Chi, Hsia Huang Kung and Lu Li, retired from public life and lived in the hills as recluses. At the close of his reign the first Emperor of the Han Dynasty, about 212 B.C. was greatly concerned about the future of the Empire. He desired to surround his son with trusty advisers and remembered these four men. He sent a faithful messenger to persuade them

to come to Court, and the arrival of this messenger in the mountain retreat is the subject of this picture. The messenger is clothed in a bright red garment and carries in his hand a jade tablet, *kung pi*, showing his Imperial authority. He finds the old men amusing themselves with music and conversation. They consented to go to Court, and on arrival were treated as honored guests. After a lengthy interview, the Emperor commended them to his son, the Heir Apparent, as faithful counselors upon whom he could rely after his death. The figure of the musician playing on the Ch'ing, a kind of harp, may be noted as showing fine drawing of drapery in nervous line and color wash.

Height, 1 foot $\frac{1}{2}$ inch; length, 3 feet 5 inches.

230—MAO TIEH

Scroll on silk. By Ma K'uei of the Sung Dynasty and older brother of Ma Yüan, about 1200 A.D. The two words "Mao Tieh" literally mean octogenarian; but words of similar sound mean cats and butterflies. This method of using phonetic tropes is very common in the Chinese language, and was intended in this instance to add dignity to the work of the artist. The charm of this picture is in the mellow color and the intimate treatment of flowering plant life. The masterly arrangement of the numerous groups of entirely different subjects on undulating ground which form a relief to the main subject, cats and butterflies, is manifest as the picture is unrolled in segments. The Chinese kittens form a playful study; the foreshortening of the face of the cats looking upwards is apparently wrong, but it appears to be the practice of all Chinese artists to draw only from the frontal point of view. The rose-bushes and the groups of violets are most refreshing.

Height, 1 foot; length, 9 feet 2 inches.

231—A SKETCH OF PLANT AND INSECT LIFE

Scroll on silk. By an artist of the Sung Dynasty. Flowers, plants, vegetables and butterflies are collected by the artist in a charming fancy sketch, which is full of vitality.

This would suggest that the time of the picture was the latter part of the Sung Dynasty, when the Tartars founded the foreign dynasty of Chin in the northern part of China. The dignity of posture lends strength to the lines of their flowing garments. Teakwood frame.

Height, 1 foot 7 inches; width, 1 foot 1 inch.

He has signed this picture on the lower left-hand corner with the four Chinese characters Wu T'ang Shen Mou, i.e., "Shen Mou of the district of Wu T'ang."
